

Consolidated knowledge in six areas of expertise

- 1 Continued urban development
- 2 Structural (building) renewal
- 3 Energy-related improvements and climate protection
- 4 Social stabilisation and public participation
- 5 Housing management and financing
- 6 Process control and management

The Center of Competence for Major Housing Estates - a strong and independent partner

- > We advocate sustainable development of the large rental housing estates built between the 1920s and 1980s in Germany and Europe.
- > We maintain a cooperation network in order to consolidate and to make the experience acquired available to our German and international partners.
- > We promote cooperation between Germany and other European countries with the aim of drawing attention to the sustainable development of large housing estates as an important challenge for European Union policy.

Our members

Our members stand for consolidated expertise, and represent both the client and the planner/designer side:

- Housing cooperatives, local authority housing and private housing companies
- Architects, planning & design and engineering consultancies
- Scientific institutes and housing industry associations
- Representatives of civic associations
- Local government and administrators
